

Case Debriefing Template

Student's Name:

Case ID:

Instructions for Use

This worksheet is designed to standardize the debriefing of Aquifer cases. Each section corresponds to key components of the case, allowing for a thorough review and discussion. Fill in each section with the relevant information from the case. Use the notes fields to add any additional insights or comments.

I. Review of the Case

Aspect	Details
Chief Complaint (What was the main reason for the patient's visit?)	
Initial Differential Diagnosis (What were the initial potential diagnoses based on only the chief complaint?)	
Key History Findings (What were the pertinent positives and pertinent negatives from the patient's history?)	
Key Physical Exam Findings (What were the pertinent positives and pertinent negatives from the patient's physical exam?)	

II. Assessment

Activities in this section can include working through the differential, creating an illness script, etc.

Top Differential Diagnosis	Medical Decision Making/Rationale

III. Plan

This section can be used to review the concepts behind labs, diagnostic imaging or treatments (lifestyle interventions, medications, referrals, patient education, etc.), follow-up visit, and/or return precautions pertinent to the case.

Aspect	Details	Rationale
Diagnostics		
Treatments		
Patient Education		
Follow-Up Plan		
Return Precautions		

Notes

Use this section to add any additional comments, insights, or reflections on the case.
