

AQUIFER EDUCATOR CONNECTION PODCAST

Episode 21: Adopting Aquifer to Teach Orphaned Topics

Guest: Karen Scaglione, DNP, Assistant Teaching Professor, St Louis University Trudy Busch Valentine School of Nursing; Member, Aquifer's Nurse Practitioner Task Force.

Host: Lynne Robins, PhD, Professor Emerita, Department of Biomedical Informatics and Medical Education, University of Washington School of Medicine, Seattle, WA.

Description: In this episode, Karen Scaglione, DNP highlights the value of using Aquifer to fill curricular gaps without adding faculty time. She describes how she incorporated Aquifer Radiology into her curriculum as self-directed learning to build students' knowledge and skills in diagnostic imaging and prepare them for licensure and practice.

Additional Resources:

- [Aquifer Radiology Flipped Classroom Workshops](#)
 - Aquifer's interactive Radiology Flipped Classroom Workshops enhance your students' learning about radiology. These ready-to-use modules were developed by a group of nationally recognized radiology educators and shown to influence student learning.
